ADMISSION.

Candidates for admission to the Freshman Class are examined in the Grammar of the Latin and Greek languages, Virgil, Cicero's Select Orations, and Sallust, or Cæsar's Commentaries, Writing of Latin, Xenophon's Anabasis and two Books of Homer's Iliad, or an equivalent, English Grammar, Arithmetic and Algebra through Simple Equations.

Candidates for a higher standing are examined in the same, and also in the Studies gone over by the Class, to which they may desire admission.

The stated times for examination are the Tuesday preceding Commencement, and the first day of the following Term. But Candidates may be examined and admitted at other times in the year, excepting that no admission to the Senior Class is allowed later than the beginning of the second Term.

Previously to examination the candidate must exhibit satisfactory testimonials, that he sustains a good moral character. If he has been a member of any other College, he will be expected to present a certificate of regular dismission.

No one can be admitted to the Freshman Class, until he has completed his fourteenth year; and no one to an advanced standing without a corresponding increase of age.

Natural Theology, Mineralogy, Botany, Zoology, Anatomy, and Physiology are taught chiefly by Lectures and subsequent examinations. The works recommended in these branches are the Bridgewater Treatises, Shepard's and Dana's Mineralogy, Gray's and Wood's Botany, Agassiz and Gould's Zoölogy, Wilson's and Paxton's Anatomy, Carpenter's Physiology, and Cutter's Anatomy and Physiology. Recitations, however, are heard in Anatomy and Zoölogy.

The following books are recommended for reference in the Classical Department: Andrews and Stoddard's and Zumpt's Latin Grammars, Andrews's or Leverett's Latin Lexicon, Ramshorn's Latin Synonyms, Crosby's and Kuhner's Greek Grammars, Liddell and Scott's Greek Lexicon (Drisler's Edition), Munk's Greek and Roman Metres, Anthon's Classical Dictionary, Butler's Atlas Classica, and Smith's Dictionary of Greek and Roman Antiquities.

Text-books in Modern Languages: Ollendorff's German Grammar, Adler's Progressive German Reader, Schiller's William Tell, Practical French Grammar (Pinney and Badois), De Fivas's Classic French Reader, Madame De Stael's Germany, Ollendorff's Italian Grammar, Teatro Italiano Scelto. For reference: Adler's German Dictionary, and Spiers and Surenne's French.

There are three regular Recitations or Lectures daily, excepting Wednesday and Saturday, when there are two.

On every Wednesday afternoon, there is a public Exercise in Declamation, in which the classes speak by divisions, and for which they are prepared by private rehearsal before the Professor of Rhetoric. Seniors and Juniors deliver original Compositions.

There is a Biblical Exercise in the several Classes once each week. These recitations are accompanied by familiar Lectures from the Instructors.

Public Worship is attended in the Chapel every Sabbath; and Prayers every morning and evening. One evening each week, there is a Religious Service by the President, or one of the Professors, which all the Students are invited to attend.

LECTURES.

1. Geology, the first Term.
2. Rhetoric, Oratory and English Literature, each Term.
3. Natural Philosophy, each Term.
4. Classical Literature, or Antiquities, each Term.
5. Botany and Mineralogy, third Term.
6. Chemistry, second Term.
7. Psychology, first and second Terms; History of Philosophy, second and third Terms; Ethics, third Term.
8. Anatomy and Physiology, illustrated by the Manikin, second Term.
9. Zoölogy, the first Term.
10. Natural Theology, the third Term.

EXAMINATIONS.

1. Of all the Classes, at or near the close of the first and second Term.
2. Of the Senior Class, six weeks preceding Commencement.
3. Of the three Lower Classes on the week preceding Commencement.

A Record is kept by the Faculty of the attainments of every student, and also of his delinquencies. Information concerning his proficiency and deportment is, when requested, communicated to the parent or guardian.

PUBLIC PERFORMANCES.

1. Exhibitions, in the second and third Terms.
2. Declamation on Tuesday evening preceding Commencement.
3. Commencement on the second Thursday of August. (August 9, in 1855.)

On the day preceding Commencement, several public Orations or Addresses are usually delivered before Societies connected with the College, by gentlemen invited from abroad.

VACATIONS.

1. Four weeks from Commencement. (From Aug. 9, to Sept. 6, in 1855.)
2. Six weeks from the Wednesday preceding the annual State Thanksgiving. (From Nov. 29, 1854, to Jan. 10, 1855.)

3. Three weeks from the third Wednesday of April. (From April 18, to May 9.)

Such students, as are obliged by their circumstances to teach school in winter, are allowed to be absent for the purpose.

EXPENSES.

The following are the principal necessary expenses, exclusive of vacations:

Tuition, $10.00 per Term, - - - -	$30.00	$30.00
Room Rent, $ 3.00 per Term, - - -	9.00	9.00
Recitation Rooms, and Ordinary Incidentals, $2.00 per Term. - - - - -	6.00	6.00
Fuel and Lights, from $9.00 to $11.00, - -	9.00	11.00
Board, lowest price in companies, $1.00 per week; highest price in families, $2.00 per week; making per year of *thirty-nine* weeks, -	39.00	78.00

The expenses for Room Rent, Fuel and Lights, are estimated on the supposition that two students occupy the same room.

In case of admission to an advanced standing, a fee of five dollars per Term, which is one-half of the regular charge for Tuition, will be required, unless such standing shall have been attained in another College.

There are some expenses, which result from taxes voluntarily imposed by the classes or societies. These, and expenses for furniture, stationery, &c., will vary according to circumstances and the character and habits of the student.

In incidental expenses, if the parent or guardian furnishes money, or authorizes the contracting of debts, a student may be very extravagant. To guard against this, parents often deposit funds with some one approved by the Faculty, who for a moderate charge will give particular attention to the pecuniary affairs of the student, and render an account of expenditures.

It is earnestly recommended to all parents and guardians not to authorize the obtaining of credit, and not to pay debts unauthorized.

PAYMENTS.

The amount of the first Term Bill must be paid by each student on his admission. Each subsequent Term Bill becomes due at the close of the Term for which it is assessed. A bond with satisfactory

surety for the payment of all the College Bills must be given by each student to the Treasurer, at the commencement of the Term when he enters.

ASSISTANCE TO BENEFICIARIES.

The regular Term Bills of beneficiaries of Charitable Associations, and other indigent pious youth preparing for the Christian Ministry, are entirely paid from the fund appropriated to that purpose. A number of indigent students are gratuitously supplied in part with furniture.

LIBRARIES AND CABINET.

The Libraries of the College and Literary Societies contain about 18,000 volumes. The College Library is accessible to all the students, according to rules established by the Library Committee. The Libraries belonging to the two Literary Societies are accessible to the members of the Societies, according to regulations established by themselves.

The Society of Inquiry has a small Museum.

The Cabinet, part of which is owned by the College, and a part deposited by its officers, occupies several rooms, and is arranged and labeled for study.

In Mineralogy, nearly all the known species are represented by about 6,000 specimens.

In Geology, there are 20,000 specimens of American and Foreign rocks and fossils.

In Botany, the herbaria contain 4,000 species of plants. The seeds and fruits of 300 species are deposited in the Zoölogical Museum.

In Zoölogy, there are about 2000 specimens of 400 species of vertebrated animals, 8000 species of shells, 5000 species of articulated animals, and 200 species of radiated animals.

Plan of Instruction.

The *object* of this department is to furnish facilities for the special study of certain branches of science or literature. The department is designed for graduates of this or of other colleges, and for any others who possess the qualifications for admission. It is especially adapted for the benefit of teachers who may wish to qualify themselves to give instruction in any of its branches. Students are not required to attend any of the College exercises.

Admission. A good moral character, and a good English education, are requisite for admission to any of the branches of this department. A knowledge of algebra, geometry, and trigonometry, is required for admission to the branches of Mathematics, Natural Philosophy, and Engineering. Students are not admitted for less than one term; but in Chemistry, instruction may be obtained for any less time.

Plan of Study. Each student may select the branch or branches to which he will attend. Instruction is given by practical exercises, recitations, or lectures, as the subject may require. The students may attend lectures, which are given in the Academic department.

Instruction in the several branches is given during the same terms as in the Academic department, and at such other times as may be agreed upon with the Instructors.

I. GEOLOGY.

Instruction in this branch is given by Dr. Hitchcock. Students have every facility for consulting the geological cabinet, which contains 20,000 select specimens, illustrating the geology of the United States, of Great Britain and Continental Europe, of Asia Minor, and of many other parts of the world. The cabinet contains the suites of specimens collected in the geological surveys of Connecticut, Massachusetts, and Vermont; also a very large collection of fossil footmarks and of concretions. Dr. Hitchcock makes excursions with the students in the neighboring country.

The following works may be used as text-books, or books of reference:

Elementary Text-Books. Hitchcock's Elementary Geology; Lyell's Manual of Elementary Geology; De la Beche's Geological Manual; De la Beche's Geological Observer; M. Alcide D'Orbigny's Cours Elèmentaire de Palèontologie et de Geologie Stratigraphiques.

Books of Reference. Reports on the Geological Surveys of the different States.

II. MATHEMATICS, NATURAL PHILOSOPHY, AND ENGINEERING.

Professor Snell gives instruction in these branches. Analytical Geometry, Trigonometry, and the Calculus may be pursued beyond the limits of the Academic course, and applications of them made to Mechanical science. Students can have instruction in Experimental Philosophy, with access to the extensive collection of apparatus in the Philosophical Cabinet. Descriptive Geometry, Shades and Shadows, Perspective, and other subjects connected with Engineering, are taught by text-books and practical exercises in drawing. In the summer and fall terms, instruction will be given in the use of instruments in field operations, as surveying, levelling, and the location of roads.

Text-Books. Chauvenet's Plane and Spherical Trigonometry; Loomis's Analytical Geometry and Calculus; Young's Calculus; Young's Mechanics; Davies's Descriptive Geometry; Davies's Shades and Shadows; Wiesbach's Mechanics and Engineering; Gillespie on Roads and Railroads.

III. CHEMISTRY.

The course of instruction pursued in the College Laboratory is adapted to the wants of each student according to his knowledge and proficiency, and the business for which he may desire to qualify himself. As the number of students is quite limited, it is confidently believed that every one will receive such attention as will enable him to make satisfactory progress in his studies.

The charge for tuition is $2.50 per week for any period less than ten weeks, and $2.00 per week for a longer time, to be paid in advance.

Chemicals and apparatus are furnished at the lowest prices, and a suitable allowance made for such as are returned.

The following works are used as text-books, or for reference:

Stockhardt's Principles of Chemistry; Will's Qualitative Analysis; Wöhler's Handbook of Inorganic Analysis; Rose's Analytical Chemistry; Fresenius's Analytical Chemistry; Berzelius on the Blowpipe; Johnston's Lectures on Agricultural Chemistry; Gmelin's Handbook of Chemistry; Schubarth's Handbuch der Technischen Chemie; Mitchell's Manual of Practical Assaying; United States Dispensatory.

IV. AGRICULTURE.

The elements of Agriculture are taught theoretically and practically by the Rev. J. A. Nash. *Books:* Nash's Elements of Agriculture, Practical and Theoretical; Norton's Elements of Scientific Agriculture; Girardin and Du Breuil's Cours Elèmentaire D'Agriculture; Johnston's Lectures on Practical Agriculture; Allen's Domestic Animals.

For Agricultural Chemistry, see under Chemistry.

V. MINERALOGY.

Instruction is given by Professor Shepard. His cabinet contains nearly all the known species, represented by 6000 choice specimens, with a great variety of crystalline forms; and one of the three most extensive and valuable collections of meteorites now existing in the world.

Text-Book. Shepard's Treatise on Mineralogy.

VI. ZOÖLOGY.

Instruction will be given in general and descriptive Zoölogy. Students have access to the Zoölogical Museum, which contains 13,000 species. In some branches the species are represented by many specimens of each, illustrating the nature of species and their geographical distribution. The following text-books may be used: Jones's Animal Kingdom; Agassiz and Gould's Principiples of Zoölogy; Chambers's Zoölogy: Cuvier's Regne Animal. Special books on particular branches may be used.

VII. BOTANY.

Professor Clark gives instruction in Botany. Students have access to herbaria containing 5000 species, and to a collection of tropical seeds. The following text-books are used: Gray's Botanical Text-Book; Wood's School Botany.

VIII. PSYCHOLOGY AND HISTORY OF PHILOSOPHY.

Professor Haven will give instruction in these subjects; and if desired, in Logic and Political Economy. The text-books in Psychology are Reid, Stewart, and Brown; in the History of Philosophy, Morell, and Cousin.

IX. PHILOLOGY AND LITERATURE.

Professor Tyler and Professor Jewett will give instruction in Greek and Latin to graduates of this or of other colleges, who may wish to pursue such studies beyond the limits of the Academic course. Mr. Merrick will give instruction, if desired, in the Persian, Arabic, and Turkish Languages and Literature. Professor Field will give instruction in English Literature. Instruction may also be given in the Hebrew, German, French, and Italian languages.

MISCELLANEOUS.

Library. Besides the general collection of works in the various branches, there are special collections in Zoölogy, and Intellectual Philosophy. Additions are also being made in Chemistry, Mineralogy, Geology, Botany, and Philology. Students in the Scientific Department have access to these books under the direction of the Instructors.

Fees. The fees for instruction may be agreed upon with the Instructors, but in other departments than Chemistry, do not exceed $20 per term (13 weeks) for five exercises per week, or in proportion for a different amount of instruction. The fees may be reduced in favor of indigent students, and in favor of classes of several students. For charges in the Chemical Department, see under Chemistry.

All fees must be paid in advance.

No charge is made for the use of the cabinets, or for attendance on lectures in the Academic course. The Library is accessible to Scientific Students at a charge of one dollar per term.

Degrees. The degree of Bachelor in Science is conferred on students who attend for one year, and sustain a satisfactory examination, in not less than two branches. These branches are specified in the diploma, which bears the signatures of the President and of the Instructors in the branches studied by the candidate. Recommendations to the Trustees for degrees are granted by vote of the Faculty.

Students who do not complete the course necessary for a degree, are entitled to certificates of their actual attainments from the Instructors.
